2025/12/19 02:10 1/1 Write code

## This section is under work

## Write code

LibreCAD code is hosted by Github where releases 2 and 3 are developed together. SourceForge is the former code repository and it is still a valid download channel.

## **Need for developers**

LibreCAD is mainly coded with **C++**. There are also some *nice-to-have* skills improving productivity:

- Qt
- Boost
- muparser
- Autodesk DXF format

If you are a developer, outstanding in C++, or a beginner we can use all the help. With a bit of determination, the IRC channel, Zulip chat and the Libre-CAD-dev mailing list, we can help you getting started and making progress.

A good starting point for developers is the LibreCAD Developer's Wiki on GitHub. You will find information on developing requirements, building from source, Git and Github usage and LibreCAD font format.
