Input GUI Class

Github Link

```
namespace lc::ui::api
```

The Input GUI class is the parent class of all input gui widgets (except button and checkbox) which is added to the dialog widget. This is an abstract class.

Label

Description

Get and set label for the Input GUI widget.

Examples

- `message(input1:label())`

- `input1:setLabel("New Input GUI")`

Enable and Disable

Description

Enable or disable the input gui widget.

Examples

- `input1:enable()`

- `input1:disable()`
