# LibreCAD Documentation

All the help files and support documentation are only available on the web.

## How the documentation is organized ?

LibreCAD team moved the documentation from previous Wiki to **Read the Docs** (RtD) and to **DokuWiki**.

The User Manual is hosted at *Read the Docs* whereas the [tutorials](#) and [how-to](#) are available on this *DokuWiki*.

## LibreCAD User Manual

The [LibreCAD User Manual](#) contains:

- **Installation** instructions including *building from source* and configuration of LibreCAD.
- **Reference** section describing the commands and their parameters.
- **User guides** providing steps to perform common tasks.

It is the primary source of documentation.

Other manuals are available:

- [https://twitter.com/eima\\_katalogoa/status/1151027522823475200](https://twitter.com/eima_katalogoa/status/1151027522823475200)
- [http://www.heikell.fi/downloads/LibCAD\\_220rc1.pdf](http://www.heikell.fi/downloads/LibCAD_220rc1.pdf)

Note that these other manual may be for older versions of LibreCAD

## Older releases of User Manual

You may find older documentations for version 1.0 and 2.0 along with some French and Spanish documents on the [former Wiki](#).
