

This section is under work

LibreCAD Documentation

All the help files and support documentation are only available on the web.

How the documentation is organized ?

LibreCAD team moved the documentation from previous Wiki to **Read the Docs** (RtD) and to **DokuWiki**.

The User Manual is hosted at *Read the Docs* whereas the [tutorials](#) and [how-to](#) are available on this *DokuWiki*.

LibreCAD User Manual

The [LibreCAD User Manual](#) contains:

- **Installation** instructions including *building from source* and configuration of LibreCAD.
- **Reference** section describing the commands and their parameters.
- **User guides** providing steps to perform common tasks.

It is the primary source of documentation.

Older releases of User Manual

You may find older documentations for version 1.0 and 2.0 along with some French and Spanish documents on the [former Wiki](#).
