LibreCAD Documentation

All the help files and support documentation are only available on the web.

How the documentation is organized ?

LibreCAD team moved the documentation from previous Wiki to **Read the Docs** (RtD) and to **DokuWiki**.

The User Manual is hosted at *Read the Docs* whereas the [tutorials](#) and [how-to](#) are available on this *DokuWiki*.

LibreCAD User Manual

The [LibreCAD User Manual](#) contains:

- **Installation** instructions including *building from source* and configuration of LibreCAD.
- **Reference** section describing the commands and their parameters.
- **User guides** providing steps to perform common tasks.

It is the primary source of documentation.

Other User Manuals

Other manuals are available:

- https://twitter.com/eima_katalogoa/status/1151027522823475200
- http://www.heikell.fi/downloads/LibCAD_220rc1.pdf

Note that these manuals may be for older versions of LibreCAD and may not reflect the command or layout found in the latest release of LibreCAD.

You may find older documentations for version 1.0 and 2.0 along with some French and Spanish documents on the [former Wiki](#).
